

Theory of Change: Improving the Health & Wellbeing of Farmworkers

FARMWORKER HEALTH SERVICES, INC.

PURPOSE:
To build the capacity of community-based organizations in order to improve the health and wellbeing of farmworkers.

FHSI PHILOSOPHY:

FHSI believes that the solutions to organizations' most difficult challenges already exist within their local communities and that building capacity, knowledge, and strong community connections enables them to address challenges head-on.

FHSI believes in meeting organizations at their starting point and working within their unique context.

FHSI believes that outreach fulfills a critical need to increase access to health and social services and decrease health disparities for farmworkers.

FHSI believes that effective outreach helps organizations to meet their mission *and* their "margin," ensuring that people-centered service delivery models respond to genuine business necessities.
